

Lost your Chimney in the 'Quake?

We will help you through the Insurance and Grant processes

If your chimney was lost or significantly damaged by the recent earthquake you may qualify to have your old log burner or open fire replaced with a new heat pump, with the cost covered under your EQC claim.

So why come to us?

We will find the right heat pump for your needs, and help you through the claim process. We're a Canterbury-owned and operated company who has built a solid reputation locally over the last two decades.

Our staff know heat pumps inside and out. They will come to your home and tailor the most effective package for your family, and your life.

We use only trusted, reliable brands which have been in NZ for many years, and comply with all current standards.

What can we do for you?

We offer a total service covering Heat Pumps, Air Conditioning, Ventilation and Cooling systems, including full service and backup.

This includes:

- Custom design and build of services
- Supply and installation
- Maintenance
- Servicing new and existing systems

Funding support from EECA's
ENERGYWISE™
(Warm Up New Zealand: Heat
Smart) programme.
